

Cosmic Cookery

Growing Galaxies in a Computer

Ingredients

One cup dark matter:

Most of the galaxy is made from invisible "Dark Matter" that we can feel but not see.

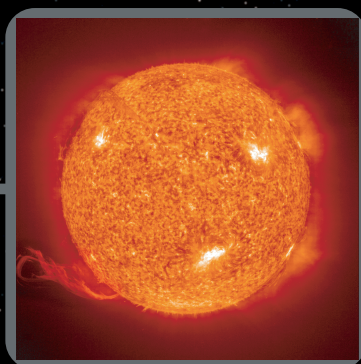

One pint dark energy:

Dark energy is a mysterious force that is pushing our Universe apart.

One teaspoon hydrogen:

Hydrogen is the most common element in the Universe. The Sun is mainly Hydrogen.

A dash of mixed elements:

The things we are made from make up an insignificant fraction of the Universe

Recipe

- 1) Mix all ingredients with gravity, and other forces.
- 2) Pre-heat oven to gas mark 300
- 3) Place mixture into our oven, a supercomputer, and bake for the equivalent of 13.7 billion years.
- 4) Serve immediately on a computer screen

The Finished Product
